Cleaning instructions:

Torro is protected from the most common stains, which can be removed by dabbing the leather with a dry cloth without rubbing it.

The best care for this product is occasional dusting. For heavily soiled areas wash with a damp sponge and a small amount of neutral soap then pass a sponge dampened with water over the leather and dry with a cloth. Never soak the leather. Never use commercial grade leather cleaners as they may contain harsh chemicals which may remove protective topcoat. Always test a new cleaner on the least visible area of the surface.
